

Testing Schaumburg Marketplace Website Functionalities. [Functional, Non-Functional]

Functional Testing:

1. **Unit Testing:** We have tested individual components of the schaumburg marketplace website, such as buttons, forms, modules, to ensure they function correctly.

- ☐ Services Module Testing
- ☐ Business Directory
- ☐ Event module
- ☐ Jobs Module
- ☐ News module
- ☐ Offers module
- ☐ About Us module

2. **Integration Testing:** We have verified that different components of the website work together as expected. This involves testing interactions between various modules or services.(e.g. Test Coverage : After clicking on the links present at the Services page, the corresponding module pages are getting displayed.)

3. **User Interface Testing (UI):** We have evaluated the website's user interface for usability, consistency, and responsiveness across different devices and browsers.

4. **Cross-Browser Testing:** We have tested the website on different web browsers to ensure compatibility and consistent behavior.

- ☐ Google Chrome
- ☐ Internet Explorer
- ☐ Safari
- ☐ Microsoft Edge

5. Cross-Device Testing: We have tested the website on various devices to ensure it functions properly across different screen sizes and resolutions.

- ☐ Apple
- ☐ Samsung
- ☐ Laptop

Non-Functional Testing:

1. **Security Testing:** Under the business directory module, We have tested that only authorized members can access or perform specific tasks.(e.g. Admin access required to perform admin related tasks)
2. **Compatibility Testing:** We have checked the schauburg marketplace website's compatibility with different operating systems, devices, and software configurations to ensure a consistent user experience across platforms.
3. **UX testing:** We evaluated and tested Schaumburg marketplace website from the perspective of the end user to assess its usability, accessibility, and overall user satisfaction.
